Foremark Performance Chemicals Awarded EcoVadis Platinum Medal in Recognition for Sustainability Performance

At Foremark Performance Chemicals (“Foremark”), we continually pursue innovative, clean and responsible chemistry to bring pure progress to our customers, our markets, and our communities. As part of that commitment, we’re proud to announce that Foremark has received a Platinum Medal rating from EcoVadis in recognition of its sustainability efforts and robust Corporate Social Responsibility practices. In the latest survey by EcoVadis, Foremark was ranked in the top one percent of the companies EcoVadis has reviewed.

Foremark improved its rating from Silver to Platinum in a single year. According to the most recent *EcoVadis Business Sustainability Risk Index*, published in October 2021, Foremark’s current-year scores were at least 30 points higher than the most recent available “heavy manufacturing” averages in each of the five EcoVadis categories: overall rating, environment, labor and human rights, ethics and sustainable procurement.

“Foremark is honored to receive the EcoVadis Platinum Medal. This accomplishment is a strong validation of our strategy to put sustainability at the center of who we are and what we do – from the sustainable solutions we provide our customers, to our carbon negative manufacturing processes,” said Randy Owens, CEO of Foremark. “In our mission, values and actions, the employees of Foremark are committed to driving improvement, achieving excellence and supporting the transition to a greener world.”

EcoVadis is a trusted global platform for assessing business sustainability, rating over 90,000 companies worldwide in over 160 countries. EcoVadis’ assessment measures companies on their Corporate Social Responsibility (CSR) and continuing commitment to implementing social and environmental practices into their operations by reviewing the quality of a company’s sustainability management through its policies, actions and results.

Being sustainable, safe and environmentally conscious are core principles at Foremark Performance Chemicals. Agile and responsive, we are dedicated to continuous improvements through ongoing investments in developing our team, processes, and systems. Foremark is steadfast and engaged to ensure ethical, safe, environmentally sound, and sustainable practices that protect each other, our customers, and the communities where we live and work.

About Foremark Performance Chemicals

Foremark Performance Chemicals is a technology-driven leader in intermediate chemicals and derivatives for oilfield, refinery and petrochemical applications. Foremark is owned by funds managed by SK Capital Partners LP, a private investment firm with a disciplined focus on the specialty materials, chemicals and pharmaceuticals sectors, managing greater than \$5 billion of assets.
